To Whom it May Concern,

I offer this letter as an absolute endorsement of the Spot TV company.

As a technology provider there are two metrics that are most important to me and my dance studio. The first is the quality of the service provided. Spot TV has proven to be nearly "spotless" as far as service uptime with minimal to no outages. If I ever had an issue, it was always operator error. The installation process was lightning fast, the installers, conscientious and good at what they do.

The more important metric, however, speaks to the support they provide behind their service. The people of Spot TV are relatable, exceedingly friendly, eager to help, and very effective at solving problems. I never think twice to recommend my parents contact them for advanced technical questions, and I never think twice recommending them to my industry peers.

I respectfully submit: Sam, Jonathan, Davis, and all of their cohorts at Spot TV, deserve the business of all participating UDMA members. I am confident that any studio that opts to engage them will have an experience that is second-to-none.

Sincerely,

J.J. Tiemeyer
